

## USAAdoption Solutions, Inc.

USAAdoption Solutions works to recruit and train permanent adoptive families, and then match those families with waiting children through the United States. We are committed to helping children and families find the right match to ensure a loving, caring, forever home. There are many agencies that work to place children with families--**USAAdoption Solutions is taking a different approach.**

Serving the state of Massachusetts and the capital district of New York, USAAdoption Solutions is committed to giving your family more options. Our staff searches for matches in **EVERY STATE**, opening up more opportunities for children to find a loving environment. We offer training for families looking to adopt older children; we help families understand their child's history and what they can expect; and we offer support long after adoption is completed.

At USAAdoption Solutions, **forever is our philosophy.**

Conscientious, Caring, and Committed . . .

## Who Are We?

USAAdoption Solutions is a non profit domestic adoption agency, opened in 2007, and one of the few agencies that places waiting foster children from ANY STATE into forever families. For children at risk in the foster care system, adoption is a safeguard against future homelessness.

## What Do We Do?

All families are certified and licensed according to the laws of their state. We provide an eight-week Exploring Adoption class to assist families in a self assessment. We search the nation to find the future waiting child or children who are the right fit for your family.

Once a child is placed, USAAdoption Solutions supports the family through the adoption process and beyond including:

- Monthly support group meetings
- 24 hour emergency beeper coverage
  - Short-term crisis counseling
- Individual and family counseling services and much much more...

## Why Adopt?

Thousands of children wait in foster care for a forever family. These children have experienced abuse, neglect, and/or maltreatment. Every one deserves a family, and a place where they can be encouraged, supported, loved and empowered to achieve their individual greatness.

## Who can Adopt?

Almost anyone. Single or married, divorced or living with a domestic partner, high-income or low-income... Anyone of any race or religion who is over the age of 21 and can provide a safe and loving home is eligible.

## How Much Does Adoption Cost?

We requests an application fee of \$250 for couples and \$125 for a single parent.

All other costs, which include training, placement, adoption services, and finalization, are all paid for through the various contracts USAdoption Solutions has with counties and states, as well as through fundraising efforts.

Subsidies and tax benefits exist for most adoptive parents.

**800-ADOPT21**

800-236-7821

500,000 children are waiting in foster care.

A shortage of trained, informed families willing to adopt them keeps them there.

We are committed to being the voice of the children that have been tossed aside.

We will not rest while there are children who are not in a family and loved.

Our commitment is as life long as the families we serve.
